

## Automobili Lamborghini Holding S.p.A.

Operative Efficiency

### Contact

**Lamborghini:** Simone Zamboni, Head of Industrial Services  
**ZLU:** Michael Thon, Principal Automotive Practice

## Lamborghini creates the basis for efficient inventory management through stock transparency

### Assignment

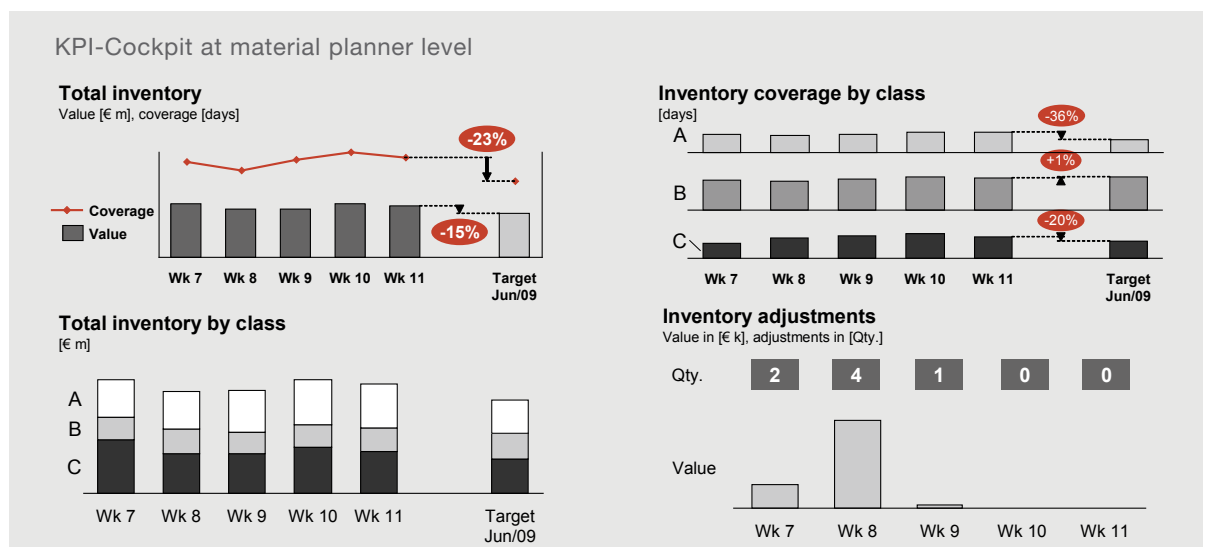

- Establishment of stock transparency (incl. setting of targets for 2009) to reduce inventory adjustments and improve operative inventory performance

### Success Factors

- Development and introduction of a KPI-Cockpit as continuous management tool for stock levels and inventory coverage
- Determination of stock reduction potential and setting of specific inventory targets for 2009
- Establishment of WiP-Teams for a structured approach towards analysing inventory adjustments
- Development of effective measures for identified problem clusters for stock deviation
- Development of a concept for a rolling inventory to improve the accuracy of the stock balance

### Delivered Results

- Stock transparency in logistics and production (incl. potentials + targets)
- Optimisation of stock responsibility between logistics and production
- Structured analysis process for inventory adjustments

The established KPI-Cockpit for stock levels not only creates transparency but also defines clear responsibilities and priorities for the operative work in material planning
